

Case Study

ENERGY.SMARTER.™

Graphic Packaging International, Inc.

Centralia, IL

Replaced legacy lighting system consisting of 400w & 1000w metal halides with Orion's 4, 6 & 8-lamp T8 fluorescent Compact Modular fixtures.

Project Metrics

Annual Cost Savings	\$74,871
Annual Kilowatt Hour Reduction	1,386,461
Load Reduction	171 kW
Annual Carbon Dioxide Reduction	843 Tons

"When we first started the process of changing the lighting throughout our plant, the driving force was for the energy savings. However, as we continued the project it became very apparent with the employees that the quality of the light was so much better. All work areas were much brighter improving the work environment for the employees. Innovative Facilities Solutions was extremely good to work with throughout this entire project, they were very open and willing to work around our production schedule. This project has been a positive experience on all levels."
